BEST WALL COLORS TO SELL YOUR HOME FASTER

Four best wall colors to sell your home faster

Colors can be added to a room in so many ways. Accessories, furniture, art are some examples of bringing in some color which can be changed out on a whim. But when it comes time to select a wall color it can be a terrifying decision for a homeowner. When staging a home to sell, some homes need to neutralize the colors but they don't all have to be "contractor beige." Here are the four best wall colors to work with because they can be used in so many spaces.

Edgecomb Gray
HC-173

Edgecomb Gray (HC-173) by Benjamin Moore is a griegie (gray and warm beige) color to use on your wall. It makes the room feel warmer and not the cold gray feeling and works with almost every and lightens up a dark living room.

Revere Pewter
HC-172

Revere Pewter (HC-172) by Benjamin Moore has a bit more gray to it. If you are not a fan of the "beige" color, then this is your best bet. It works well in living rooms and other rooms too and is used by my clients not just in the home they are selling but in their future home as well.

**SW 6106
Kilim Beige**
Interior / Exterior
Locator Number: 204-C1

Kilim Beige (SW 6106) is a popular Sherwin Williams color and is a very neutral beige color. It has more richness and warmth than your basic contractor beige color. Kilim beige is what I actually have painted in most of my house because it goes with everything!

**SW 7036
Accessible Beige**
Interior / Exterior
Location Number: 249-C1

Accessible Beige is a light to warm beige color with a little bit gray and has some green undertones. It looks best in south facing rooms that receive an abundant amount of light. If used in a north facing room, it can make the room feel darker.

Paint tips

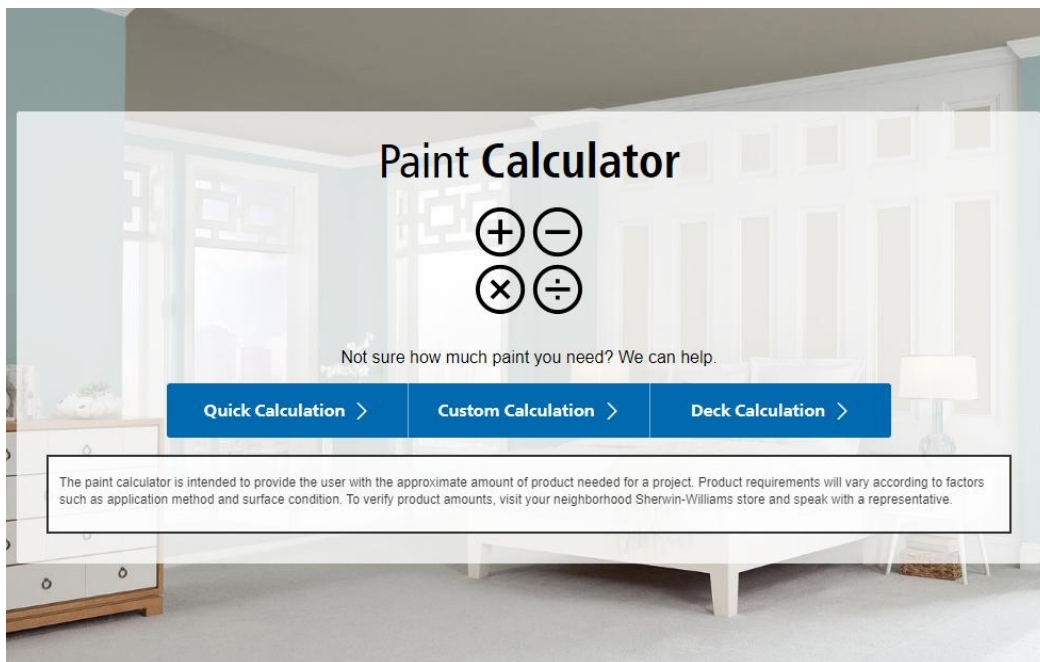

- The colors here may not show correctly on your computer screen. Be sure to view the paint sample in the room you want to paint and with the current lighting.
- Paint colors **will look different** under fluorescent lighting in the store versus the incandescent lighting you may have in your room.
- Benjamin Moore and Sherwin Williams also have “peel and stick” color swatches that range in size from 8 inches by 8 inches or bigger so you don’t have to rely on those itty-bitty small samples.

Paint sheens

- Flat – used for ceilings
- Eggshell – most popular and used for bedrooms, family room and living room
- Satin - used for high traffic areas like the kitchen and bathroom
- Semi-gloss – used for trim, molding or doors

Are you painting it yourself?
